Limited warranty - 15 years

* The backboard of this enclosure is painted to Cal-Trans specification:2 coats of primer and 2 coats of white enamel

painted over entire backboard even edges

NOTE: The vented roof is raised 1" above the enclosure body and overlaps each of the 4 sides of the enclosure by 1 1/2" which promotes good air circulation. The vented roof has 4 stainless steel bolts welded to the underside, which inserts through the screen frame into the holes in the enclosure where they are bolted into place. This allows for servicing and replacement of the screen if necessary
